

Week 3 - Report

TEAM 14

ENGAGEMENT STRATEGY AND SCENARIO BASED RECOMMENDATIONS

Excelerate Project Management Internship
Project: AI-Powered Productivity Masterclass

Introduction

Engagement is a critical factor in the success of both remote teams and learning programs. This report examines two realistic scenarios where participation declined despite structured planning. It identifies key challenges, uncovers root causes, and offers strategic, evidence based solutions. The goal is to help project leaders and program designers build more connected, accountable, and adaptive environments that foster sustained engagement.

Engagement Factors

Identify participation challenges in remote & digital teams

Suggest practical engagement solutions

Key Engagement Drivers

Clarity: Clear roles & accountability

Relevance: Meaningful contributions

Communication: Consistent, empathetic updates

Timeliness: Tasks aligned with schedules

Tools: Easy, reliable collaboration platforms

Scenario 1

Disengaged Remote Team

Scenario 1: Disengaged Remote Team

DESCRIPTION

Team members creating an AI training program

Mid-project engagement drop: delayed updates, passive meetings, low initiative

IMPACT

Last-minute task swaps

Unplanned decisions

Slow collaboration & bottlenecks

CHALLENGES & ROOT CAUSES

Challenges:

Delayed updates

Passive meetings

Low motivation

Weak team bonding

Root Causes:

Unclear roles & accountability

Lack of recognition

Limited psychological safety

STRATEGIC RECOMMENDATIONS

Root Cause	Recommendation	Implementation
Role Ambiguity	RACI reset	30-min sync + visual RACI update
Communication Gaps	Weekly check-ins	15-min stand-ups + Slack reminders
Uneven Initiative	Task rotation	Alternate leads weekly
Motivation Dip	Micro-recognition	“Contributor of the Week” posts
Remote Disconnection	Virtual coffee chats	10–15 min bi-weekly

Best Practices:

- Google Project Aristotle: Psychological safety + clear structure enhances performance
- Agile methodology: Stand-ups improve accountability & transparency
- Deloitte case study: Rotating leadership increased task closure by 25%

Scenario 2

Low Masterclass Engagement

Scenario 2: Low Masterclass Engagement

Description

- 150 participants in AI Masterclass
- Declining attendance & Slack activity
- Low workbook and exercise completion

Challenges & Root Causes:

Attendance Drop / Low Q&A:
Relevance gap, weak
commitment

Peer Collaboration: Passive
community, topic fatigue

Feedback Fatigue: Long
surveys, low perceived value

STRATEGIC RECOMMENDATIONS

Root Cause	Recommendation	Implementation
Relevance Gap	Audience segmentation	Pre-program survey, tailored examples
Low Commitment	Gamification	Points, badges, leaderboards
Passive Community	Active moderation	Weekly prompts, highlight top contributions
Feedback Fatigue	Micro-surveys	Short pulse surveys, real-time updates

Best Practices:

Duolingo Model: Streaks & points boost engagement

Salesforce Trailblazer: Moderated peer activity sustains participation

Pre-session Customization: +45% completion rate

Key Insight:

Engagement challenges stem from both structural & psychological factors

Success Strategies:

Design engagement early

Track engagement continuously

Adapt leadership quickly

Pilot Approach – Track KPIs:

Task completion rate

Live session attendance

Peer interaction & deliverable quality

Outcome:

Higher participation, sustained motivation, and a cohesive team culture

Conclusion & Implementation Framework

CONCLUSION

THANK YOU
